MALNUTRITION ANALYSIS

TEAM MEMBERS:

- 1. K. Abitha
- 2. K. kayalvizhi
- 3. V. Kaviya sri
- 4. V. Logeshwari

MALNUTRITION:

Malnutrition is an imbalance between the nutrients your body needs to function and the nutrients it gets.

It can be malnourished from lack of protien, vitamins and improper intake of calouries.

4 broad types of malnutrition:

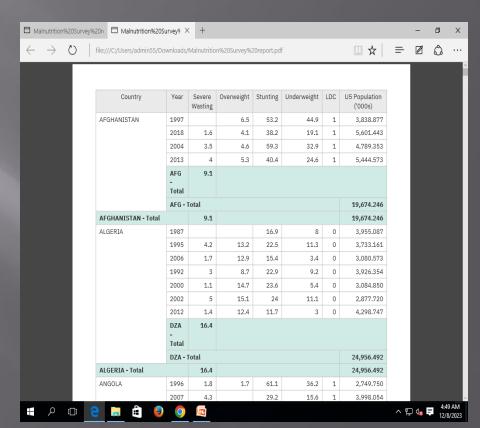

- Wasting
- Stunting
- Underweight
- overweight
